Except for the station at Oksywie-Gdynia, each telephone station has a crew of one non-commissioned officer and eight sailors.

2. A new telephone line, running the length of the Polish coast, has been laid, mostly above ground (on poles) and partially underground. This line is used only by the navy and the WOP (Military Border Guard). In certain ports along the Polish coast, the WOP has its own telephone points and stations. These stations are, in turn, connected with the various central telephone stations along the coast which are under the control of WOP brigades.
